<b>Description</b>			
<b>Situation:</b>			
Old QT: In 2.8.9.2 Type of grazing system, "mixed (eg agro-pastoralism, silvo-pastoralism)" can be selected.			
New QCAT: In 3.2 the main category "Mixed (crops/ grazing/ trees), incl. agroforestry" contains the subcategories:			
<ul style="list-style-type: none"><li>• Agroforestry</li><li>• Agro-pastoralism</li><li>• Agro-silvopastoralism</li><li>• Silvo-pastoralism</li></ul>			
However, these can only be selected if the main category (Mixed) was selected.			
<b>Mapping:</b> If in old QT, mixed (eg agro-pastoralism, silvo-pastoralism) was selected, the main category "Mixed" should be checked in QCAT 3.2.			
<b>Problem:</b> In QCAT 3.2 maximum 2 choices can be made for the main categories. If "Mixed" is also selected, there are sometimes more main categories selected than allowed.			
<b>Scenarios:</b> ?			

#### History

##### #1 - 22 Aug 2016 12:01 - Lukas Vonlanthen

Decision:

Use comment field for mixed grazing land, "mixed" main category is mapped by main category in QT only. Therefore, there should not be any problems regarding max choices of main categories.
