Description

When mapping fields from old QT to new QCAT as a comment field, an introduction text is used to identify the value.

Example:

Old QCAT: Future (final) land use (after implementation of SLM Technology)(if relevant):

New QCAT: 3.2 Comments

Mapping: Future (final) land use (after implementation of SLM Technology): [field content]

Ideally, this introduction text should be translated if the questionnaire content is translated. Is this necessary/feasible?
