Resolution:			
Description			
<p>When mapping QT 2.5.1.1. Type and layout of agronomic measures, it says that a coma-separated list of measures is to be mapped to comments of 3.6. Does this include the "other" values? These are often repeating values, which bloats up the list of measures:</p> <p>Example: T_BEL001</p> <p>Type of agronomic measures: better crop cover, removing less vegetation cover (every year), better crop cover2004, better crop cover 2004, better crop cover 2005, manure / compost / residues, mineral (inorganic) fertilizers, mineral (inorganic) fertilizers, mineral (inorganic) fertilizers, mineral (inorganic) fertilizers, mineral (inorganic) fertilizers, breaking compacted topsoil, minimum tillage</p> <p>vs</p> <p>Type of agronomic measures: better crop cover, manure / compost / residues, mineral (inorganic) fertilizers, breaking compacted topsoil, minimum tillage</p>			

History

#1 - 22 Sep 2016 16:31 - Lukas Vonlanthen

- Status changed from *New* to *Resolved*

Decision: Do not use "other" in first comment field.

#2 - 26 Sep 2016 11:13 - Lukas Vonlanthen

- Status changed from *Resolved* to *Closed*
