Target version:	QCAT Backlog	Spent time:	0.00 hour
Resolution:			

Description

When a single case is opened below, there is the block 'View Sections'.

- Below this block, a new block should be added 'Linked Approaches and Modules'.
- There the linked approaches and modules should be listed.
- A logged in user should have the ability to add new module or link another questionnaire
- An invitation from a compiler should not be needed.

How should we proceed with the fact, that the linkage with QA/QT is done INSIDE the questionnaire?

History
