Description

I do not entirely understand the mapping indications for Altitudinal zonation

QT 2.7.6

QCAT 5.2

I mapped the checkboxes (again, first trying to map them all, then only ranking high, if still more than 2 added them to comment section - as for Annual Rainfall [#1065](#)). However, there can be multiple comments (one for each altitudinal zone selected) -> how will they be mapped to the comment field? (Rainfall is similar and it says manual mapping).

History

#1 - 03 Oct 2016 09:27 - Lukas Vonlanthen

Same for landforms (QT 2.7.7)

#2 - 28 Oct 2016 11:48 - Lukas Vonlanthen

- Status changed from New to Closed

Will be solved manually.
