Target version:	QCAT Backlog	Spent time:	4.00 hours
Resolution:			

Description

When doing a request on the api with

```
https://qcat.wocat.net/en/api/v2/questionnaires
```

Problem:

every resulting questionnaire in the list points to the africaans language (af):

```
"count": 4,  
  "next": "",  
  "previous": "",  
  "results": [  
    {
```

```
      "name":
```

```
"Recuperación de prácticas tradicionales de producción, como estrategia productiva con resiliencia  
en Humahuaca",
```

```
      "updated": "2017-03-01T09:52:39.264579Z",
```

```
      "code": "technologies_1671",
```

```
      "url": "/af/wocat/technologies/view/technologies_1671/",
```

```
      "details": "/en/api/v2/questionnaires/technologies_1671/"
```

```
    },
```

```
    {
```

```
      "name":
```

```
"Ferias comunitarias campesinas como alternativa de comercialización para la mejora en la rentabil  
idad y mantenimiento de la actividad productiva tradicional",
```

```
      "updated": "2017-03-01T08:32:50.231852Z",
```

```
      "code": "technologies_1743",
```

```
      "url": "/af/wocat/technologies/view/technologies_1743/",
```

```
      "details": "/en/api/v2/questionnaires/technologies_1743/"
```

```
    },
```

Solution:

It should point the the language used in the api request.

History

#1 - 04 Sep 2017 14:09 - Sebastian Manger

Two-fold solution:

- /af/ stems from the elasticsearch index - store language-agnostic urls when indexing questionnaires
- add language depending on request when returning api-response

#2 - 18 Sep 2017 15:15 - Sebastian Manger

- Assignee set to Kurt Gerber

- % Done changed from 0 to 90

Resolved on develop; request a quick check before going live.

#3 - 18 Sep 2017 15:18 - Sebastian Manger

- *Status changed from Accepted to Feedback*

#4 - 28 Sep 2017 12:16 - Kurt Gerber

- *Status changed from Feedback to Resolved*

Happy with it.

Please deploy on qcat

#5 - 28 Sep 2017 19:19 - Kurt Gerber

- *Status changed from Resolved to Closed*
