Description

Notes

- Indicators for compilers ('My SLM data'): "a new version of the configuration is available".

- When editing a published version, a dialogue appears:

    - Indicates that this is a new version
    - Points to documentation of changes. This documentation built dynamically based on the configuration.
    - Open question: is this dialogue 'one time', or always visible? This is a user guidance question, I'd suggest to make it always available. Problem: the 'review info box' (see screenshot) is already now rather messy.

Estimate break down:

- New page for 'configuration release notes' (params: configuration type) display data defined by [#1781](): 8h
- Screen design: indicator for 'alert' when creating a new version if the configuration has changed; link in review box to 'release notes': 6h
- Tests: 6h
