Description

Notes

- A questionnaire can be displayed for a specific version.
 - A version is either the current version, or any version that has been published and is now inactive.
- A historic version is always displayed in full, there is no split-screen or 'display next to each other' available.
- The button 'See history' on the questionnaire detail shows a dropdown to all previous version, linking to this new page.
- This requires many changes in the backend (views, template loading, forms).
- Maybe: add indicator for 'changed fields' (see [#1796](#))

Estimate break down

- Depends on [#1789](#) and [#1781](#)
- Update 'history' dropdown on questionnaire detail: 2h
- Refactor queryset and configuration loading; allow old data to be loaded in specific cases: 8h
- Tests: 8h
