

## QCAT - User Story #1785

### API updates

06 Feb 2018 14:37 - Sebastian Manger

<b>Status:</b>	Closed	<b>Start date:</b>	06 Feb 2018
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	100%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	Carbon Benefit	<b>Spent time:</b>	22.00 hours
<b>Resolution:</b>			
<b>Description</b> <b>Intro</b> <p>The main reason to implement a new version of the configuration is so the API returns structured data (=from checkboxes) instead of text. It's important to keep the distinction between API version and configuration version in mind; the API version will not change (<b>v2</b>). All current users of the API will be informed about the changes.</p> <b>Decisions</b> <ul style="list-style-type: none"><li>• The structure of the questionnaire data changes depending on the edition. The 'configuration' is a new concept for the API users, so make it explicit.</li><li>• The list view by default returns all questionnaires, regardless of their editions.<ul style="list-style-type: none"><li>• A new field on the list indicates the current edition of the questionnaire.</li></ul></li><li>• An optional filter is available to filter specific editions (e.g. "show only questionnaire in edition 2015")</li><li>• <del>The configuration version is now a required field / parameter for all questionnaire detail endpoints.</del></li><li>• <del>In order to display 'stable' structure of the data, a request to an 'old' questionnaire should return a 404 / 302 (not found/redirect).</del></li><li>• Maybe: add an endpoint for the configuration object.</li></ul>			
<b>Subtasks:</b>			
Task # 1786: Update serializer, change stored data in elasticsearch			<b>Closed</b>
Task # 1787: Routes and views			<b>Closed</b>
Task # 1788: Inform consumers about changes			<b>Closed</b>
