Target version:	QCAT Backlog		**Spent time:**	0.00 hour
Resolution:				

Description

Description

When viewing questionnaires entered in an old version of the configuration, a hint could be displayed for fields/questions which have changed compared to the currently active questionnaire configuration. It only indicates which fields have changed and not what exactly changed.

Maybe use separate table to keep track of changed fields for a configuration version?

Estimate break down

- Depends on how diff is solved ([#1781](#1781))
- Extends QuestionnaireQuestion (adding method to show if field has changed) (~4h)
- Modify templates (add indicator) and styling (4h)
- Tests (4h)

History

#1 - 06 Feb 2018 16:56 - Lukas Vonlanthen

- Description updated

#2 - 27 Feb 2018 09:52 - Kurt Gerber

- Status changed from New to Accepted
