Description

When opening list fo questionnaires in <https://qcat.wocat.net/admin/questionnaire/questionnaire/> the questionnaires are listed an can be filtered by configuration, status and country.

Each case offers a link to open the case in the editor.

Deleted cases are shown too and not flagged as deleted. So they are listed with their last status before deletion. But when clicking on 'edit', the application answers with an error (page not found).

Solution:

Deleted cases should be flagged as deleted.
