Target version: QCAT v0.9 - Second Beta	Spent time: 0.00 hour
Resolution:	

Description

Acceptance Criteria:

As discussed on the standup (22. Feb. 2016)

- API users must be associated to an organization. As tokens - user is a 1:1 relation, put this info in a new field.
- More context can be gathered on the wocat user management page (not automated)
- Access elasticsearch API instead of database
- Use existing helper methods for description and such
- Use default config for list view
- Provide option to override config with a specified one on the detail view
- Add filters on the list view (which filters?)
- Add documentation for Accept header / response formats
- Add available configs for each questionnaire
