Description

Logging

As a software developer
I want to have a log of performed actions on the questionnaires during the review cycle
so this info can be used for the messaging.

Acceptance criteria

- The complete list of events: * new phase (edit -> review -> published) * content update * new reviewer * new comment (?)
* new questionnaire created
- All events result in an entry in the database with timestamp, user, questionnaire and message

History

#1 - 15 Aug 2016 08:25 - Kurt Gerber

- Target version set to QCAT Backlog

#2 - 02 Feb 2017 14:29 - Kurt Gerber

- Status changed from New to Closed
