Target version: QCAT v0.9 - Second Beta	Spent time: 0.00 hour
Resolution:	

Description

Acceptance criteria

- django-compressor is installed.
- static files can be written to a shared block in the header or footer of the base template.
- All of the following must happen only for the productive environment:
 - static assets are compressed and minified
 - static asset files are created with a unique filename, so the assets can be cached without expiry date on the client side.
 - html output is minified
